

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

May 1, 2001

LB 542

hearings and those will be Saturday. I did not change the schedule so...figuring that all of your plans towards the end of session had already been set, so tomorrow, since we're only working three days, I'd like us to work as close to four o'clock as we can. Tomorrow we'll work through the noonhour and then try to get a full day in tomorrow. Then we'll start back next Monday. We'll start session at 10:00 a.m. At 9:00 a.m. is going to be a meeting of the Redistricting Committee and they're going to have an Exec Session at that point in time and I am sure Senator Coordsen, the Chair of that committee, will have more to say about that. Late nights next week will be, late being to 6:30 under the pattern we've done this week and last week, but we'll work till 6:30 or thereafter on Monday and Wednesday nights of next week, and I'll put all this in a memo that will be coming out to you. Also, I'm going to set the sixtieth day to be the last day of May. We've worked out an accommodation with the Governor to get things back if they get over there. They will get them back to us in time to override any possible vetoes. So that sixtieth day will be the last day of May. Mr. Clerk, we resume back to LB 542.

CLERK: Mr. President, LB 542, Senator Coordsen has an amendment, FA222. (Legislative Journal page 1750.)

SPEAKER KRISTENSEN: Senator Coordsen, you're recognized to open.

SENATOR COORDSEN: Thank you, Mr. Speaker. Members of the body, FA222 is a redraft of where we were before lunch and what the amendment does is strikes line 23, 24, 25, and 26, on page 6 of AM1048, and line 9 on page 7; and then on page 6 it adjusts the program total to reflect the reduction in capital construction expenditures in Program 901 - Facility Improvements. I think we came through a discussion this morning that indicates a concern that at this moment in time is reflected upon. Equipment storage facilities for the lack of better terminology, more accurate terminology, we would say machine sheds, in many configurations are used for many other types of...from anything from commercial storage facilities to warehouses to all sorts of activities where there is equipment, material, or supplies that need to be protected from the weather. And, as I indicated
